

Rangerforce Recon and the Bigfoot Ranger Team

ask

Does Bigfoot exist?

My name is Ian Garrett, I live in Morgan Hill California and have a small group of individuals across the nation interested in answering the question,

Does Bigfoot exist?

The Bigfoot Ranger Team (BRT), Rangerforce Recon's long range reconnaissance patrol focusing on the mystery surrounding the existence of Bigfoot, takes the approach of using military disciplines and know-how and apply it to the question, do large bipedal hominids, known as Bigfoot or Sasquatch, exists in remote areas of the Pacific Northwest?

The BRT takes a proactive approach in answering this question by venturing into the back reaches of remote areas, primarily on foot, in search of the hiding, resting and nesting places of this elusive creature. We feel that in order to answer this question we need evidence in the form of video, sound recording, still photos and physical evidence that would leave no doubt in anyone's mind that Bigfoot does exist. We know that this can only be accomplished by first hand contact with these animals and the best place to obtain the evidence is to find where they reside and go to them as opposed to waiting for them to come to us.

The BRT is made up of ordinary people who have a desire to go into the backwoods to find their own answers to this mystery. Members of the BRT are from many walks of life but we all welcome the military approach to organizing searches, called recon by the BRT, in answering the question of Bigfoot's existence.

June 20-22, 2003 we will be executing

our first field recon operation, designated, Operation: LOOK SEE. The recon will be conducted in the Six River National forest. What we would like is to have members of area HAM radio clubs join us by setting up and operating a control net for this operation and manning and running three remote communication stations from various ridge tops or if possible establishing a temporary repeater system in the recon zone in order to maintain 24 hour contact with the forward recon team, designated Ranger Team One.

We plan to travel up a remote canyon, following a creek which has been reported as having Bigfoot sightings with the intent of looking for signs of the existence of Bigfoot as we move towards the head waters of this remote creek. We intend to patrol some by day as well as rest and set up a forward listening post and maintain this post throughout the night using strict light and sound discipline. We would like to have 24 hour contact with the outside world through 2 meter HAM radios and would like your help in doing this.

Let me say that our intention is not to harm or kill a Bigfoot or any other creature in the wild, but only to observe, record and report our finding in order to answer this question once and for all of us.

DOES BIGFOOT EXIST?

This will undoubtedly take a lot of work to make happen over a long period of time, but if we all join together, bringing our skills and talents together with the purpose to tell the world that an incredible man-like animal DOES exist and here's the proof then I think we can all be apart of answering one of the last great mysteries of this age.

Does Bigfoot Exist?

Help us prove that they exist, or help dispel the lie that they don't.
